3	Are precautions in place to prevent or respond to fire?			
4	Does the activity require special precautions? (e.g. removal of jewellery, tying back long hair)			

Exceptional Circumstances

There may be reasons why additional conditions may have to be taken into consideration when completing this risk assessment.

When completing a risk assessment in exceptional circumstances you need to consider how this will impact on the activity, what additional measures or changes you will need to make for each identified hazard in order to reduce risks involved in running the activity. These changes will need to be incorporated into the assessment of how hazards can be reduced or avoided to respond appropriately to the exceptional circumstances you are facing.

Notes for exceptional circumstances:
